**Re: Clean Water Act Sec. 308 Request V-W-90-308-11**

**Gentlemen:**

Attached, pursuant to the Section 308 request cited above, are flow measurements of discharges by the Pfizer Pigments Company facility in East St. Louis, Illinois, to sanitary sewers leading to the American Bottoms Regional Wastewater Treatment facility (ABRWTF) during November, 1989. These measurements are recorded by employees of Pfizer. Please note that flow measurements are also recorded from the same devices by ABRWTF employees. We have not yet received from ABRWTF its measurements for November, 1989 but will send you a copy of them when we receive them if you so desire. They both represent measurements recorded at the same flow measurement devices. These two sets of measurement may be somewhat different, however, because they were recorded at different times during the day. Pfizer records measurements at approximately 7:00 a.m., whereas ABRWTF records them somewhat later.

To the best of my knowledge and belief the measurements recorded by Pfizer personnel were the measurements observed by them and represent actual flows within the normal range of accuracy of the type of flow meter utilized.
